

Twilight

The sun sets not to hide the beauty of its rays, but it provides a place for the moon to shine at night.

Every beauty has its own time, place and enthusiasts. Not that the moon's rays are not as beautiful as the sun, but they emit different aesthetics and atmosphere so that each of them will definitely be expected.

Be like Twilight..

Whose presence always bridges the two beauties that are mutually contradictory, but provides an inherent influence on the minds of the admirers.

I believe the Ming Chuan students and Ming Chuan teachers & staff have a similar relationship with the twilight and sun or moon. Because I believe every Ming Chuan students have their own beauty, skills, trademarks and culture and such beauties need to be connected by people who want to nurture it. The teachers and staffs come as a twilight who want to see the sun and the moon grasp the whole world's attention and try to bridge different beauties and nurture them the best way they can.

Also Ming Chuan students should not be ashamed of their difference with others, we have our own skills & trademarks, because of that we should combine those with people around us to make it even more perfect. Shine bright like sun & moon who gives joy and mesmerized people who see it.

All of these aspects need to be in sync for everything to happen from students, teachers and staffs. The best achievement won't be accomplished with just one person doing it right. It's about the synergy of one another that brings life and joy to others in this world and ourselves.
